Jobs Module Integration

Last Modified on 11/06/2026 7:51 pm EST

AIA Style Billing is fully integrated with the Jobs module:

- Install Items: Serve as the source for the scheduled values (Continuation Sheet form).
- Job Costs: Can be referenced when determining work completed.
- Job Status: Track billing progress alongside job completion.
- Change Orders: New change orders cannot be added to a job with AIA Style Billing enabled. Change orders that existed before AIA Style Billing was enabled remain accessible.
