

Real-Time App & Secure, Cloud-Based Platform
for Fire System Inspections & More

Real-Time Results
Powerful, Flexible Features
Compliance-Driven Templates & Reports

All of Your Inspection Data in **One** Place

fireNspec is a stand-alone, cloud-based software platform for driving seamless compliancy across inspections, installations, and service operations. fireNspec makes it simple for companies to digitize their inspections and spend less time shuffling paperwork, giving you more time to grow your business.

What can we do for you?

- ✓ View inspection progress in real-time
- ✓ Unlimited inspections/PDF Reports
- ✓ Unlimited barcode scans
- ✓ Unlimited customers/sites
- ✓ Unlimited Admin users
- ✓ Multiple branch offices
- ✓ Multiple techs in the same inspection
- ✓ Customizable templates
- ✓ Repeatable scheduling calendar & more!

Optimize Your Team's Efficiency

fireNspec is a game-changing tool designed to help streamline the inspection process and provide transparency of the work being performed, the platform offers unmatched ease of use and complete accountability.

- Streamline your process & perform more inspections
- Eliminate messy paperwork & transcription errors
- Significantly reduce time spent creating reports
- Export reports to customers fast
- Increase your competitive differentiation & grow your customer base

No Internet Connection? No Problem!

Data from the inspection is securely encrypted and automatically syncs to the server for real-time access by the office. If Wi-Fi is not available on-site, the inspection can still be performed. The information is stored on the technician's device and automatically syncs when the Internet connection is restored.

Wide Variety of Applications

Not only does fireNspec offer NFPA-compliant templates for inspections, the platform also provides options for Joint Commission, DNV, ULC, and other organizationally-compliant templates. Moreover, if we don't have it, we can develop it! Our customizable template engine gives you more flexibility than any other inspection software available.

Customizable Templates

fireNspec features pre-built NFPA & ULC-compliant templates and our simple drag and drop editor makes it easy to edit them or build your own templates to fit your needs.

Additional Features:

- Web portal for each site – securely stores all documents & reports
- Data migration & custom development services
- Import your customers & pre-populate template fields
- SedonaOffice integration
- Monitor and track inspectors with real-time GPS, event log & chat
- User-friendly interface
- Built-in device library of popular manufacturers
- Add photos & comments to your reports
- Easy creation of reports for other applications including fire systems, sprinkler systems, extinguishers, site surveys, security, video, access control, IT server rooms, service, fire pump maintenance, elevator maintenance & more!
- Unparalleled personalized onboarding and training
