

OPT

Last Modified on 01/09/2023 4:00 pm EST

OPT Button

When the OPT button is selected, the OPT Main Menu form (with customized buttons) will be displayed. This is an add-on feature contracted through OPT Business Services (a SedonaOffice Partner). The OPT Button and Menu is activated by SedonaOffice and installed by OPT before the button will be available on the function button toolbar.

Button Actions can include the following actions:

- Launch a website/portal
- Launch a local program on the computer
- Run a SedonaSync event
- Run a pre-determined SQL Script

All actions are programmed by OPT and are licensed accordingly.

For more information on this option, visit OPT at: <http://www.optbusinessservices.com>.
