# Report Manager

## Report Manager

The Report Manager is a listing of all SedonaOffice reports available. Each report is associated with one of the Application Modules. All report access is controlled by User Group Security; a User may have access to one, several or all reports as granted permission by User Group Security.

Report names followed by an asterisk* were custom designed according to the specifications of a particular SedonaOffice customer. Any SedonaOffice customer may use any of the custom reports at their own risk.

The "List" reports are values in the company's SedonaSetup tables. Not every setup table in SedonaSetup has a printable report available from the Report Manager.
