

# Move a Customer to Another Collection Queue

Last Modified on 11/27/2023 9:30 am EST

This function button is used to move a customer from a Sequenced Collection Queue to a Non-Sequenced Collection Queue or to move a customer from one Non-Sequenced Collection Queue to another Non-Sequenced Collection Queue. A customer may not be moved from one Sequenced Collection Queue into another Sequenced Collection Queue.

Clicking this function button will display a list of all Non-Sequenced Collections Queues; the User will select the desired Collection Queue into which the customer will be moved.
