

Zones

Last Modified on 01/09/2023 12:46 pm EST

This form is used to create and maintain the Zone List for the System. Each Zone may be linked to a Signal Type and/or a Responding Authority. If linking to a Signal Type; these must first be created in the SedonaSetup Signal Types setup table. If linking the zone to a Responding Authority; these must first be created in the SedonaSetup Authorities setup table.

To enter or modify the System's Zone information, you must first open the System record in edit mode, then click on the C/S Info button which is located at the bottom of the form. Next click on the Zone List tab.

To enter a new record, click on the New button located at the lower right of the form, enter the information and click on the Save button located next to the New button.

Remember to click on the System form Save button at the bottom right of the form (this is a double-save process).
