

OPT Mailing Services

Last Modified on 01/10/2023 12:12 pm EST

SedonaOffice has partnered with OPT Business Services as an expert company is setting up and managing SedonaSync Events. Among the services provided by OPT is the emailing of any and all Invoices created within SedonaOffice. Emailing customer Statements is also one of the provided services. OPT will help solve your company concerns by providing solutions that allow your company to focus on managing and growing your company. One of the ways OPT accomplishes this is by fully utilizing the SedonaOffice product, SedonaSync. Through the combined use of real-time customer notifications, and extensive internal reporting there will be valid, measurable improvements across your entire business. From keeping your customers informed and up to date on every aspect of their installation or service experience, to providing your company with feedback from customers, and then effectively showing you how all of your departments interacted with these events, you start to get a true picture of where your company is excelling, and where there is room for improvement.

Services provided by OPT are contracted directly with OPT Business Services. You may contact OPT Business Services by visiting their website at www.OPTBusinessServices.com or contacting their business office at (727) 258-7229. For a more technical view of the invoice emailing services, see below.
