

Credit Card Setup from the EFT Processing Form

Last Modified on 06/01/2026 11:35 am EDT

On the main application menu, expand the Accounts Receivable module, and select the EFT Processing menu option. The Payment Processing form opens. Click the **Payment Methods** button at the upper right of the form to setup a new credit card or bank account.

The remainder of the process is the same for setting up a credit card from a customer record. Click on the link for the remainder of steps to follow.
