

Customer Bank Setup from the EFT Processing Form

Last Modified on 06/01/2026 1:40 pm EDT

On the main application menu, expand the Accounts Receivable module, and select the EFT Processing menu option. The Payment Processing form opens. Click on the Payment Methods button at the upper right of the form to setup a new credit card or bank account.

The remainder of the process is the same for setting up a customer bank account from a customer record. Click on the link for the remainder of steps to follow.
