

Create a Purchase Order from a Job Record-Expense Items

Last Modified on 10/01/2025 4:33 pm EDT

Purchase orders for expense items can be created from a job record.

When clicking on the Purchase Orders button from the Job Tools toolbar and right-clicking in the white area to the right, select the option Create a Labor PO. This opens a blank purchase order where you can create a non-parts PO and have it automatically linked to the job.
