

Prevailing Wage

Last Modified on 01/11/2023 12:37 pm EST

The Prevailing Wage setup table is used for tracking and calculating direct labor expenses at a rate that may be different than the normal rate used for the Installer. Some government jobs require the installing company to comply with specific pay regulations. In cases such as these, when a job is created, you would assign a Prevailing Wage code to the job on the Job Work Order form. When a User is entering timesheets, they will be able to select the Prevailing Wage rate instead of the normal installer rate.
