

Cost Details Toolbar-Timesheet

Last Modified on 01/11/2023 1:52 pm EST

Selecting the Timesheet button from the Cost Details Toolbar will display a list of all labor timesheets posted to the Job.

This includes:

- Auto-generated timesheets from dispatching an Installer for an appointment
- Timesheets manually entered within a Job
- Bulk timesheet entry
- Payroll timesheets entered within a payroll timesheet batch

The total amount listed in the Cost Details Timesheet form should match the amount displayed in the Labor field of the Job Costing form.
