SedonaSetup - CM - Customer Custom Fields Tables 1,2,3

Last Modified on 01/12/2023 9:32 am EST

If a label was assigned to the Customer Custom Fields Table 1, 2 or 3 field, you will then enter the choices in the corresponding table.

In this example we chose to track the Prior Alarm Company for the customer in the Table 1 field. For each choice you would like the User to be able to select from, create one record in the corresponding setup table. The number of records you may enter is unlimited.

The entries in the example Custom Fields Table 1 below are the choices that will be available in a drop down menu in the Customer Information record, on the tab labeled Custom Fields.
