

SedonaSetup - CM - RMR Reasons

Last Modified on 01/12/2023 9:34 am EST

□

RMR Reasons (recurring monthly revenue) is a code that the User is required to select primarily when creating new recurring, modifying recurring or cancelling recurring. RMR Reasons provide many reporting capabilities.

Each RMR Reason code must be assigned a reason type; these reason types are used by SedonaOffice in producing reports that may be found in the Report Manager within the Client Management report group.

The Reason Types are controlled by SedonaOffice and may not be deleted or modified.

The RMR Reason code is also used when posting a Company Rate Change batch.
