

# SedonaSetup - OP - Document Type

Last Modified on 01/12/2023 2:23 pm EST

□

If your company has purchased and will be using SedonaDocs, you may attach documents to a customer, site, system, job, service ticket, vendor, employee setup, or to the company general documents. When adding a new document, you must select a document type from a drop-down list. Create an entry in this table for each of your document types.
