SedonaSetup - SV - Instruction Notes

☐

The Instruction Notes setup table is used to create a list of special instructions that may be added to any Ticket.

The Name field is a text field and will allow up to 50 characters and the Note field, which is also a text type field will allow up to 1,024 characters.

Once a list of Instruction Notes has been created, they may be manually attached into any Ticket on the Notes form by clicking on the Instructions button.
