

SedonaSetup - JM - Job Phases

Last Modified on 01/12/2023 2:18 pm EST

□

Job Phases, used only in the Job Management module, is primarily designed to provide a tool for Job resource planning; Labor and Materials.

Job Phases also control when you are able create an invoice for a Job.

One Phase Code is pre-populated in this table - this is considered the Default Phase; you may change the Code name and Description if desired.

Adding additional Job Phases is optional.
