

Custom Job Label

Last Modified on 01/18/2023 5:24 pm EST

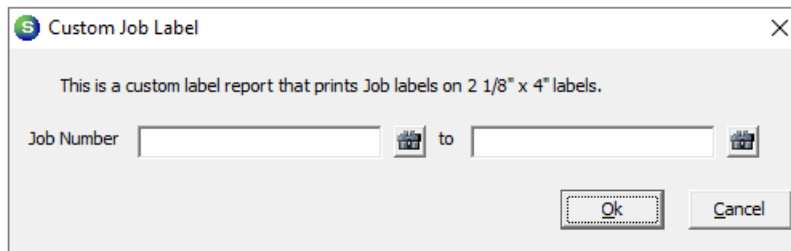

The Custom Job Label is designed to print a label for use in labeling kitted parts for jobs to better identify parts staged for installation. The information is designed to fit on a 2 1/8" x 4" label stock designed for pin-fed dot matrix printers. One label will print for each job selected in the job number range.

Report Selections

Two selection forms will be displayed to the User.

Printer Selection - Select the Printer where the labels will be printed from the drop-down list.

Job Number Selection - Enter or lookup the starting Job Number and the ending Job Number. Labels will be printed for all Job numbers within the range specified.

Custom Job Label

This is a custom label report that prints Job labels on 2 1/8" x 4" labels.

Job Number  to
