

SedonaWeb Manage Customer Logins

Last Modified on 07/10/2023 3:11 pm EDT

Manage Customer Logins

If a subaccount has registered for SedonaWeb, when viewing the master account, you may click on the Settings tab and then select the option, Manage Customer Logins, to view all registered subaccount customers.

If the subaccount cancels and you want to prevent the customer from logging into their account, click on the Enabled button, which will change the status to Disabled.
