

Master Cycle Billing - Invalid Use of Null

Last Modified on 09/12/2024 6:02 pm EDT

If you receive the Invalid use of null error while trying to run cycle billing on your master account, it is most likely a null in the reference column in AR_customer_recurring. You can fix this with the script below

```
update AR_CUSTOMER_RECURRING
```

```
set REFERENCE = ''
```

```
where REFERENCE IS NULL
```
