

Keep Credit Card Expiration Dates Current

Last Modified on 09/13/2024 5:22 pm EDT

Forte's Account Updater service enables merchants to prevent service interruptions to their recurring transactions by automatically updating cardholder account information for Visa, MasterCard, or Discover credit cards that may have been replaced or reported lost or stolen. The Account Updater service works by exchanging electronic credit card account updates through a batch FTP process with existing account databases that are maintained by the card associations. This keeps declines to a minimum and ensures a more stable cash flow for merchants

Someone will have to contact Forte partner support to sign up for the service.

Details can be viewed in the link below.
