

# Where is the ACH Upload File in Version 5 of SedonaOffice?

Last Modified on 09/13/2024 5:59 pm EDT

In version 5, there is a copy of the uploaded transactions kept on the machine that completed the EFT upload. This file is used to check against the Download option in EFT processing. The file can be found in this location:

'C drive - users - specific user - appdata - local - sedonaoffice - company name - ach - achupload'
