

# Forte Data Mapping

Last Modified on 09/13/2024 6:01 pm EDT

When interacting with data from Forte, several of their fields map directly to our fields in Sedona Office. Below is a list of Forte Fields and Sedona's corresponding Field name(s)

1. Forte Merchant ID = Sedona Merchant\_ID
2. Forte Location ID = Sedona Organization\_ID
3. Forte Payment Token= Sedona ACH\_Direct\_Token
4. Forte Transaction ID = Sedona Trace\_Number
5. Forte Customer Token = Sedona Customer\_Token
6. Forte Card Type = Sedona Card\_Type, Payment\_Method
7. Consumer ID = Sedona Customer Number\*

\*The consumer id in forte is a user defined field so does not always directly line up with the Sedona Customer number. Forte does not have a dedicated field for customer numbers
