

Run-time Error During Printing – Data Source Not Specified

Last Modified on 10/28/2024 11:39 am EDT

When users install SedonaOffice, there is a Registry Editor that can be used to set the value for the data source for their Sedona Master/SedonaOffice database. If that data source is incorrect, they will get this error:

To resolve the issue, navigate to RegEdit, then find the below fields. Edit the field with the incorrect data source and it should resolve the issue.
