How do I clone a Role Group?

You can copy existing role groups as presets for new role group creation. To find this feature, follow these steps:

1. Log into SedonaWeb 2.0.
2. Click Role Group.
3. In a row for a role group, click the clone role group button. This opens the Clone Role Group Manager page.

   ▫

4. Type a Group Name and Group Description. Any user with rights to the Role Groups page can clone a role group.

   ▫

5. Click the Submit button.
