

# Exclude from High Frequency Check on Inspection Records

Last Modified on 06/29/2026 4:33 pm EDT

When Grouping Inspection Tickets together by entering a Group Number, and you want to create All Inspection Tickets that are due on the same date, you would use the Exclude from High Frequency Check option.

**EXCLUDE FROM HIGH FREQUENCY CHECK** – If this option is selected, the inspection is excluded from the High Frequency Bypass logic.

Example: A Fire System has three Inspection Records all due on July 1<sup>st</sup>.

- Quarterly Visual Inspection
- Semi-Annual Water Flow Inspection
- Annual Visual and Equipment Testing

Description	Frequency	Group #	Service Level	Last Insp.	Next Insp.
Annual Visual and Equipment Testing	Annual	1	Fire Inspection	Never	7/1/2026
Semi-Annual Water Flow Inspection	Semi-Annual	1	Fire Inspection	Never	7/1/2026
Quarterly Visual Inspection	Quarterly	1	Fire Inspection	Never	7/1/2026

The software would generate a grouped ticket containing all three inspections rather than only the Annual Inspection

all date for July 1<sup>st</sup>.
