

Tax Limits

Last Modified on 08/05/2026 9:18 pm EDT

SedonaOffice supports tax limits for items with capped tax amounts:

1. Setting Tax Limits

- For install items with tax limits, specify the maximum tax amount.
- This is common for large-value items in some jurisdictions.

2. Tax Limit Calculation

- As work progresses, the system tracks the cumulative tax charged.
 - When the tax limit is reached, no additional tax is charged.
 - The Continuation Sheet form reflects the correct tax amount.
-
