## **Enhancements/Features**

### **Update API to allow Sites to be deleted**

We have added the endpoint DELETE/api/Customer/{customerId}/{siteId}.

This required the updated stored procedure "Customer\_DEL\_from\_API2" for SedonaOffice version 6.2.0.12.

## **Special Upgrade / Installation Instructions**

If your company uses the SedonaCloud API, IT will update the SedonaCloud version at the same time as your SedonaOffice upgrade. This is to ensure compatibility with all modules using SedonaCloud.

## **Supported Environments**

- This version of SedonaCloud requires SedonaOffice version 6.2.0.12 or above.
- Server is on Microsoft .Net 4.6.1
