SedonaWeb 1.0 Enhancements/Features

Upgraded version of jQuery to the latest in SedonaWeb 1.0 [00092073, 94059]

To enhance product security, we updated all references to jQuery to use version 3.7.1.

We also updated the SedonaWeb 1.0 application to target .NET Framework 4.8. This helps ensure TLS 1.2 compatibility.

Special Upgrade/Installation Instructions

If your company uses SedonaWeb 1.0/SedonaAPI 1.0, IT will update the version at the same time as your SedonaOffice upgrade. This is to ensure compatibility with all modules using SedonaWeb 1.0/SedonaAPI 1.0.

.NET Framework 4.8 automatically uses TLS 1.2. TLS 1.2 must be the only TLS version Enabled in the Registry. TLS 1.0 and TLS 1.1 must be disabled. Verify they are disabled and TLS 1.2 is enabled.

Supported Environments

- This version of SedonaWeb 1.0/SedonaAPI 1.0 requires SedonaOffice version 6.2.0.9 or above.
- Server (where SedonaWeb 1.0 is installed) has Microsoft .NET 4.8 installed.
