SedonaWeb 1.0 Release Notes

August 2025

Version 2.7.84

SedonaWeb 1.0 Enhancements/Features

Added Configurable Payment Options for SedonaWeb1.0

We changed SedonaWeb 1.0 to follow the web enabled setting in SedonaOffice. If the web enabled setting is set to Y, then the credit card payment is allowed in SedonaWeb 1.0. If the web enabled setting is set to N, then the credit card payment is not allowed in SedonaWeb 1.0 and the credit card type cannot be added. This distinction can prevent a credit card type from being used in SedonaWeb 1.0 while still allowing it in SedonaOffice. Note that any credit card type set to inactive in SedonaOffice cannot be web enabled for SedonaWeb 1.0. Inactive credit card types will not appear in SedonaWeb and cannot be added.

Special Upgrade/Installation Instructions

If your company uses SedonaWeb API, IT will update the version at the same time as your SedonaOffice upgrade. This is to ensure compatibility with all modules using SedonaWeb 1.0.

.NET Framework 4.8 automatically uses TLS 1.2. TLS 1.2 must be the only TLS version Enabled in the Registry. TLS 1.0 and TLS 1.1 must be disabled. Verify they are disabled and TLS 1.2 is enabled.

Supported Environments

- This version of SedonaWeb 1.0 requires SedonaOffice version 6.2.0.20 or above.
- Server (where SedonaWeb 1.0 is installed) has Microsoft .NET 4.8 installed.
