

SedonaWeb 1.0 Release Notes

October 2025

Version 2.7.85

SedonaWeb 1.0 Application Corrections

SedonaWeb 1.0 v2.7.82.1: Issue with SedonaWeb not allowing pay selected invoices [00119764, 118237, 119437, 119479, 120065, 125584]

When users clicked the Pay Selected button on invoices, it refreshed the page and unselected the invoices that were previously selected.

We corrected this so that when users click the button, it shows the total amount for all the selected invoices and the form of payment.

Special Upgrade/Installation Instructions

If your company uses SedonaWeb API, IT will update the version at the same time as your SedonaOffice upgrade. This is to ensure compatibility with all modules using SedonaWeb 1.0.

.NET Framework 4.8 automatically uses TLS 1.2. TLS 1.2 must be the only TLS version Enabled in the Registry. TLS 1.0 and TLS 1.1 must be disabled. Verify they are disabled and TLS 1.2 is enabled.

Supported Environments

- This version of SedonaWeb 1.0 requires SedonaOffice version 6.2.0.21 or above.
- Server (where SedonaWeb 1.0 is installed) has Microsoft .NET 4.8 installed.
