# Application Corrections

## Accounts Receivable

### Adding Country to Forte Form

**Issue:** The country is not specified on the Forte form, which causes issues for Canadian Customers.

**Solution:** Added country to the Forte Form, allowing it to populate with the country code from SedonaOffice.

### Make Country in Forte Form Editable

**Issue:** In the Forte form that comes up when adding new payment information, there is a country field to specify for each payment information entered. This field was un-editable in SedonaOffice.

**Solution:** Made the field editable by users when creating new payment information.
