About This Document

This document provides information related new enhancements and software corrections for SedonaOffice version 6.1.0.55.

Special Upgrade / Install Instructions

If upgrading to SedonaOffice 6.0 and higher, the following related updates are also required:

FSU Updates - iOS devices must be on iOS version 11 or newer. Please also check the app store for any updates to your FSU app

SedonaWeb - If your company uses SedonaWeb, IT will update your SedonaWeb version at the same time as your SedonaOffice version. This is to ensure the highest level of PCI compliance throughout all applications

SedonaCloud/SedonaAPI 2.0 Setup - If your company uses the SedonaAPI, IT will update your SedonaAPI version at the same time as your SedonaOffice version. This is to ensure compatibility with the SalesAutomation module.

If you are not a SedonaCloud customer, please review the requirements for the new API before requesting the update. For a copy of pre-install requirements, please contact: sedonaoffice.support@boldgroup.com

Performing Update - Once you have reviewed all of the above information, and followed all preparation steps, contact SedonaOffice support. We will note on your account that you have received the Release Notes and are ready for update. SedonaOffice IT will then contact you to schedule your update.

Supported Environments

Minimum System Requirements:

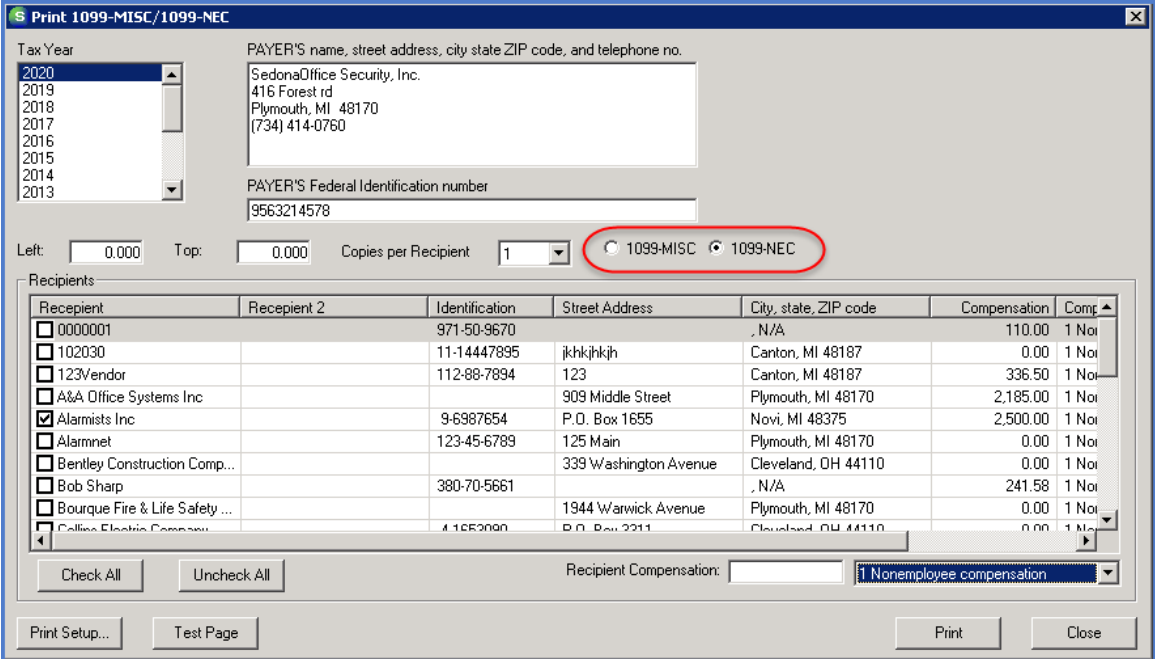

Server is on Microsoft .Net 4.6.1

Features and Enhancements

Report Manager

Print 1099 Report

Description: Updated the Print 1099 form to account for the changes for tax year 2020. Changes were made to the print layout as to align with the pre-printed 1099-NEC and 1099-MISC forms. Changes were also made to the Print 1099 setup form to accommodate both the 1099-NEC and 1099-MISC forms.

Application Corrections

Accounts Receivable

Previously Funded Transactions Missing Deposit Check

Issue: Previously funded transactions are not always creating the appropriate negative deposit check due to the transaction not including certain values.

Solution: Ensure the values that had to be present were made present.

Miscellaneous

SedonaOffice Stages Integration

Issue: While enhancing the SedonaOffice Stages Integration, found a few issues within the old integration. In the setup form for the integration, testing the connection would freeze the form. There was also an issue with adding a new customer.

Solution: Fixed the found issues with the old integration to be able to start building onto the new integration.
