Application Corrections

This hotfix has two application corrections.

Accounts Receivable

Resolved Issues
<p>Site Info Not Listed on Cycle Invoices</p> <p>Resolved an issue when printing cycle invoices for a customer that had multiple sites with recurring items. The invoice was only showing one of the sites and listed all recurring under that site instead of listing each site with its own recurring site under it. The printing process now gets the site id from the AR invoice item instead of from the AR invoice.</p>

Inventory

Resolved Issues
<p>Runtime Error:3021 When Attempting to Return Parts</p> <p>Resolved an error that was preventing users from returning a part to a vendor using Inventory > Return to Vendor.</p>

Stored Procedures

Stored Procedures Updated: none

Special Upgrade / Installation Instructions

If upgrading from a SedonaOffice version prior to 6.0, the following related updates are also required:

FSU Updates - iOS devices must be on iOS version 11 or newer. Please also check the app store for any updates to your FSU app.

SedonaWeb - If your company uses SedonaWeb, IT will update your SedonaWeb version at the same time as your SedonaOffice version. This is to ensure the highest level of PCI compliance throughout all applications.

SedonaCloud/SedonaAPI 2.0 Setup - If your company uses the SedonaAPI, IT will update your SedonaAPI version at the same time as your SedonaOffice version. This is to ensure compatibility with the Sales Automation module.

If you are not a SedonaCloud customer, please review the requirements for the new API before requesting the update. For a copy of pre-install requirements please contact: sedonaoffice.support@boldgroup.com.

Performing Update - Once you have reviewed all the above information, and followed all preparation steps, contact SedonaOffice support. We will note on your account that you have received the Release Notes and are ready for update. SedonaOffice IT will then contact you to schedule your update.

Supported Environments

Version Support

SedonaCloud Users - If your company uses SedonaCloud in any manner (Sales Automation, Time & Attendance, eForms, SedonaWeb 2.0, or the SedonaCloud API for integrations such as the Manitou integration), you need to update your SedonaCloud to version 1.40.1.2 or higher when you update SedonaOffice to 6.2.0.7.

Minimum System Requirements

- Server is on Microsoft .Net 4.6.1
