Application Corrections.....	4
API credit not setting the tax group - Sedona UAT [00144687]	4
Special Upgrade/Installation Instructions.....	5
Supported Environments	5

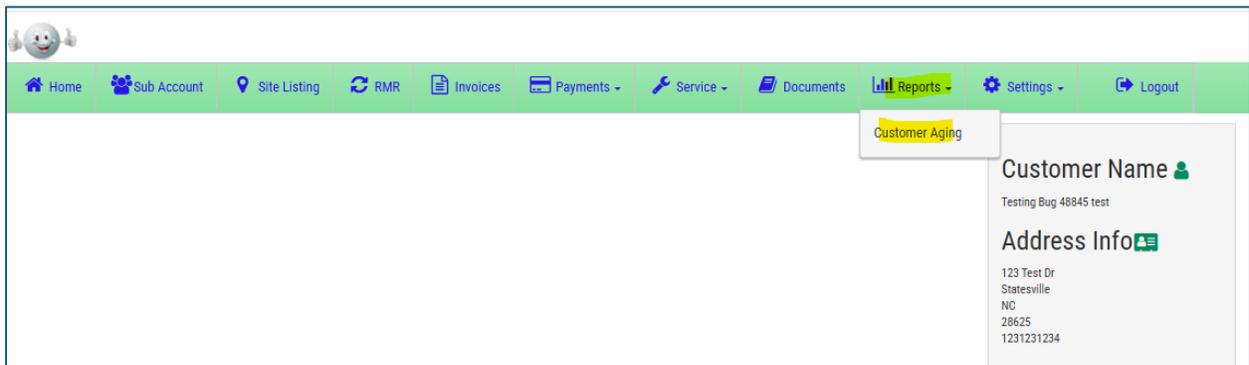

SedonaWeb 2.0

Enhancements/Features

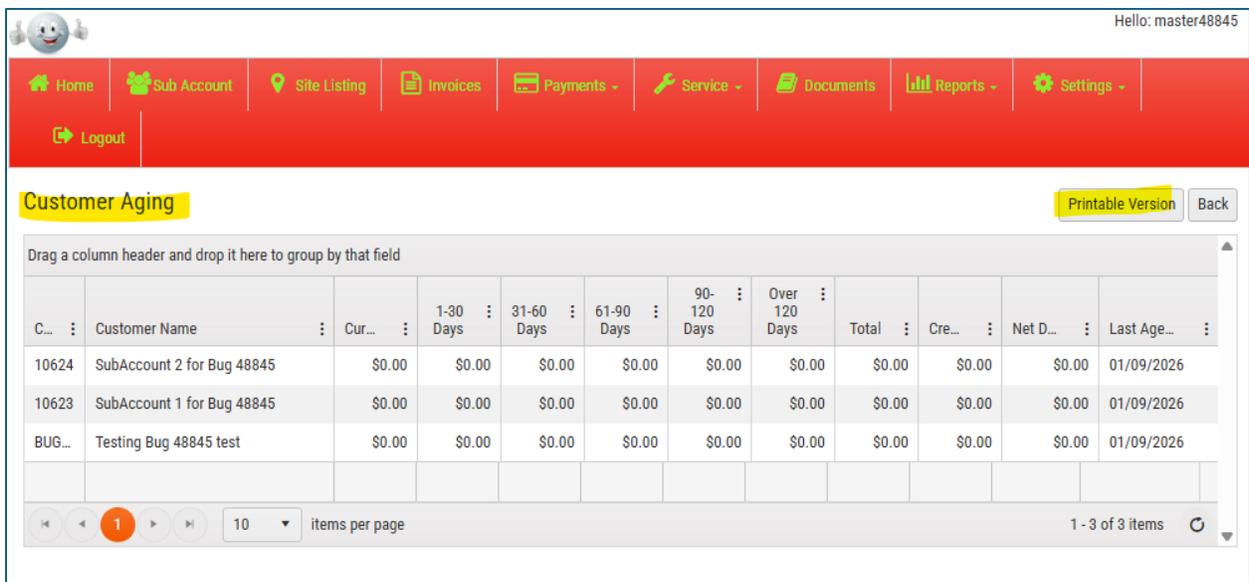

Added Aging Report to Portal

We added a Customer Aging Report. This is available only for master account users and is on a Reports tab shown between Documents and Settings. (A master account user is a portal user that is associated with a master account in SedonaOffice.)

To see the customer aging report, click **Reports > Customer Aging**.

To generate a printable version of the aging report, click the **Printable Version** button:

This is an example of a printable aging report:

Customer Number	Customer Name	Current	1-30 Days	31-60 Days	61-90 Days	90-120 Days	Over 120 Days	Total	Credits	Net Due	Last Aged Date
1580	SubAccount 2 for Bug 48845	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	01/09/2026
1579	SubAccount 1 for Bug 48845	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	01/09/2026
1578	Testing Bug 48845 test	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	01/09/2026
Totals		\$0.00									

Added Subaccount Name with Master Customer Invoices

We added the subaccount name when viewing invoices from a master customer so users can identify which customer belongs to.

Added Invoice Details in Printable Invoice Version [00140373, 148540, 145909, 144657]

SedonaWeb 2.0 now displays complete invoice details in the printable version. We improved readability and user experience.

Part Code Length Increased

We increased the part code and vendor part code from 25 characters to 126 characters. We changed this in these modules:

- Accounts Payable: Purchase Order Parts Service
- Accounts Receivable: Credit Item Service
- Accounts Receivable: Customer Invoice Service
- Inventory: Part Service
- Inventory: Receipt Parts Service
- Service: Service Ticket Part Service

Purchase Order Number Length Increased

In the Accounts Payable module, we increased the PO (purchase order) number length from 25 characters to 50 characters.

Application Corrections

Inactive problem codes in SedonaOffice that have SedonaWeb checked off are still appearing in SedonaWeb 2.0 [00146050]

Creating a new service ticket was loading inactive problem codes.

We corrected this to load only active problem codes for customers and master customers.

Getting 502 error upon logging into SedonaWeb 2.0 API site (Too many characters in about page and contact page content preferences) [00147105]

Login requests failed with HTTP ERROR 431 due to oversized authentication cookies.

We resolved this issue so that the browser will now only hold a small key identifying the session, which keeps the cookies small and secure.

SedonaAPI 2.0

Enhancements/Features

Job Notes Length Increased

We updated the CustomerNotes and JobNotes endpoints to apply nvarchar(max) notes. This allows them to accommodate longer notes (over 4,000 characters).

Shipping Reference Length Increased

We increased the Shipping Reference number length from 25 characters to 40 characters. This is used on purchase orders.

Application Corrections

API credit not setting the tax group - Sedona UAT [00144687]

If no tax group was set in the API call, then the tax group defaulted to N/A or ID 1.

We added a check before setting the default to N/A to pull the tax group from the Site Group ID if it is a valid value.

Special Upgrade/Installation Instructions

If your company uses SedonaWeb 2.0/SedonaAPI 2.0, IT will update the version at the same time as your SedonaOffice upgrade. This is to ensure compatibility with all modules using SedonaWeb 2.0/SedonaAPI 2.0.

.NET Framework 4.8 automatically uses TLS 1.2. TLS 1.2 must be the only TLS version Enabled in the Registry. TLS 1.0 and TLS 1.1 must be disabled. Verify that they are disabled and that TLS 1.2 is enabled.

Supported Environments

- This version of SedonaWeb 2.0/SedonaAPI 2.0 requires SedonaOffice version 6.2.0.22 or later.
- Server (where SedonaWeb 2.0 is installed) has Microsoft .NET 4.8 installed.
